Performance-based pay

After the new wage regulations have entered into force, the new piece rate, partial piece rate and bonus pay pricing must be based on the pricing criteria that entered into force on the same day.

Old piece rate, partial piece rate and bonus pay pricing used after the date in question must therefore be revised so that earnings increase by EUR 0.30. The pay increase may be implemented in partial piecework and bonus pay work by increasing only the fixed wage element or only the variable wage element, or by increasing both so that the hourly increase required by the general increase is achieved in earnings.

The personal wage increase caused by the general increase of table-based wages may only be more than the general increase in cases where the increase of the personal wage is caused solely by the increased table-based wage.
